Flanged Check Valves FC Series

This flanged Controllable Anti-Pollution Check Valve is dedicated to be installed as Backflow Prevention device (code EN1717: EA) in potable water installations and other sanitary appliances.

The device can also be used in processes like distribution networks and pump houses.

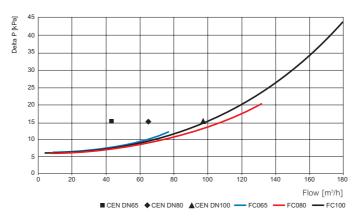

This flanged Controllable Anti-Pollution Check Valve is dedicated to be installed as Backflow Prevention device (code EN1717: EA) in potable water installations and other sanitary appliances. The device can also be used in processes like distribution networks and pump houses.

Features of the FC Check Valve:

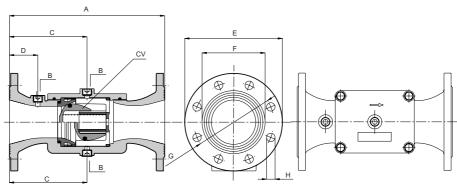

- Compact construction
- Construction and performance in compliance with national standards and European standard EN13959
- Modular Check Valve cartridge for fast and easy maintenance
- No internal parts to be lost whilst replacing the cartridge
- Low pressure loss
- Ranging from DN 65 (DN 60) up to DN 250 inclusive and according to DIN PN16

Pressure loss curve FC065, FC080, FC100
